

Safety and Wellness Calls

- According to the US Census, nearly 1/3 of all seniors live alone. Senior isolation is both common and dangerous.
- Our Care Team is comprised of trained medical assistants. They will engage directly with clients for increased safety and wellness.
- Our Care Team establishes an on-going relationship with each client, which enhances the care plan and their wellbeing.
- Each call is summarized and sent to client contacts (family members /friend and/or home care agencies) via text or email. The call summary is a powerful tool that keeps everyone informed about the health and wellbeing of the client.
- The call frequency (1-2 times per week) ensures each client is connected as an addition to the in home care visits. The increased engagement prevents isolation and may increase longevity.

Enhances Your Home Care Business

Call summary reporting logged in our “Care Call 4 You” online portal and sent via text or email to the home care agency and client’s contacts.

Agency will receive daily summary reports with all client summaries and “Provider Alert / Attention Required” summaries at top of report.

Home care agencies will have access to an online portal for client caseload input and management, as well as call summary history.

- Add clinical monitoring to your Care Plan
- Stand out from your competition
- Help Keep Client safe and well between home care visits
- Diversify by adding a new revenue generator
